

SUBJECT: FLARE TOWER REFURBISHMENT
OUR TEAM: 6-12 PERSON

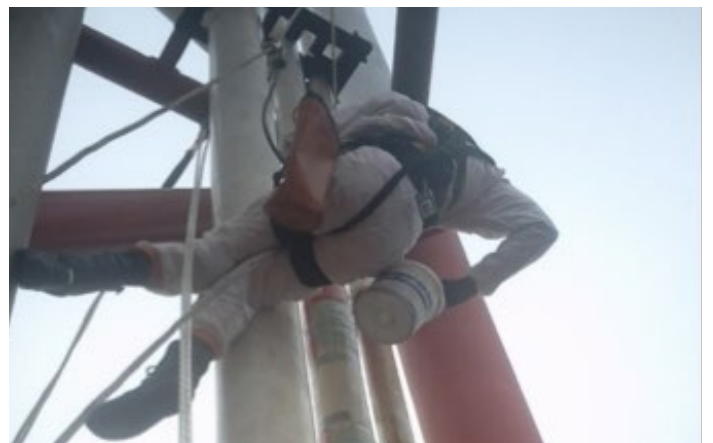

PROJECT OVERVIEW:

AquaTerra successfully and safely changed out flare tips, replaced radiation panels and completed a PDO and DROPS sweep. The project delivered was a complete turnkey construction package resourced, managed and closed out by AquaTerra's multi-disciplined team.

KEY CHALLENGES:

- Complex heavy lift rigging work scope
- Management of multi-level working on complex work scope
- Cross haul planning and execution

TURNKEY OFFERING:

- Engineering survey and work pack development
- LOLER lift plan and focal point
- Installation of rigging and lifting equipment
- Multi-disciplined rope access construction team
- Structural and piping destruct
- Piping construct
- Surface preparation and painting
- Installation of netting to reduce exclusion zone around derrick, facilitate multi-level working and reduce PDO risk

AGILE APPROACH:

- Maximised productive time within time constraints due to adverse weather and project schedule
- Rotating core team eliminated non-productive time and increased utilisation and productivity
- Flexibility of multi-disciplined and self-sufficient team reduced bed space and aircraft seat requirements

ADDED VALUE:

- Increased productivity allowed early completion of planned scopes and execution of additional scopes intended for future shut down
- Project completed within schedule
