

## EFFICIENT, ACCESSIBLE INSPECTION DATA MANAGEMENT SOFTWARE

Developed to build a secure, compliant, reliable portal for technicians and clients to upload, view, assess and maximise the use of critical inspection data.

Providing a streamlined and accurate means of reporting on inspections.

**AquaTerra's cloud-based Veritas software is a Non-Destructive Testing (NDT) report writing and management system developed for the creation and presentation of NDT reports.**

The software allows NDT technicians to create detailed and accurate reports for a range of NDT techniques whilst streamlining the entire process by utilising customised templates with 'form field data' for fast, consistent reporting.

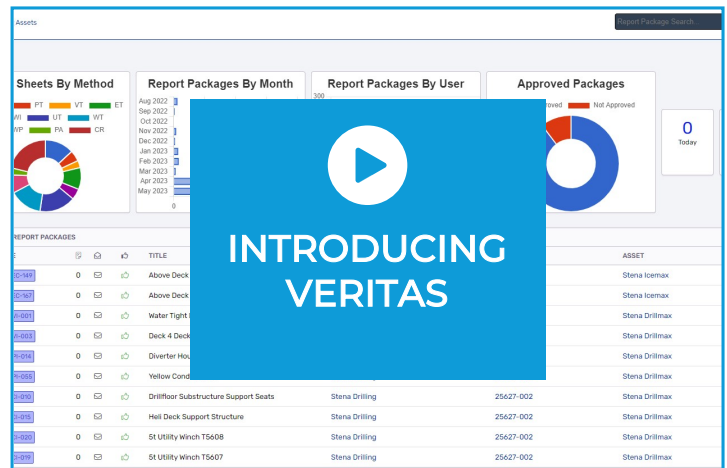

Veritas is web based and intuitive, designed to increase productivity and save time, making it a great tool for the user and the end client.

Efficient management of inspection data is vital in today's fast-paced business.

Veritas revolutionises the process, eliminating manual tasks and paper-based systems.

It ensures compliance, reliability, and productivity, empowering businesses with real-time insights and enhanced operational efficiency.

## HOW DOES VERITAS WORK?

## PRODUCT SPECIFICATIONS

### CLIENT & TECHNICIAN PORTAL ACCESS

- Clients can access reports, data and software tools to review and interrogate inspection data.
- Comprehensive reporting capabilities for a range of NDT techniques that are compliant to ABS, DNV and UKAS.
- DROPS reporting module allows survey data to be captured and presented for fleet-wide analysis.
- Automated report generation that saves time and increases productivity.
- Digital signature capabilities for secure and compliant report sign-off.
- Automatic data analysis that eliminates the need for manual calculations and reduces the risk of errors.

## KEY BENEFITS

- User-friendly interface that is easy to learn and use, even for non-technical users.
- Customisable report templates that can be tailored to specific industries and applications.
- Cloud-based storage that provides secure access to reports from anywhere with an internet connection.
- Customisable report templates that can be tailored to specific industries and applications.
- All reporting data can be extracted for further processing and analysis
- Historical inspection data and reports can be uploaded.
